Principles for being online from Mobile:

- Respect the already established [site rules and policies](#)
 - Don't show any explicit or provocative content in Free Chat.
- Watch out for your positioning towards the mobile's camera, your face should be clearly visible. It takes a bit planning to get it just right.
- Keep your look and room glamorous
 - Environment: When streaming from home keep your environment clean and tidy, be streaming from the bedroom or the kitchen. Streaming from an unsuitable environment isn't allowed.
 - Appearance: Do not look messy. Always make sure that your outfit, make-up and hair is done and you are ready to appear in front of your fans. Being able to go online from mobile opens a lot of further possibilities, but that doesn't mean that you shouldn't look your best.
 - Check how to improve your appearance [here](#)
- It is not allowed to go live while driving the car

Tips and Tricks

To stream the right way, your phone must face you the right way. For example, if you are streaming while laying down on the bed (horizontally), your phone needs to be laying down on its side as well (landscape mode). And if you are streaming standing up (vertical), your phone needs to be standing up as well (portrait mode).

Remember this simple rule, and your fans will enjoy your Mobile Live streams more than ever before!

Below you'll find all the information you need to create an amazing streaming experience for your viewers from the necessary policies to keep in mind all the way to the best technical setup you can work towards.

- Do strive for variety: Move around a lot, show your viewers your home or the neighborhood you live in (while keeping unregistered people out of the livestream of course), but also hold cozy nights from time to time, where its just you, your bedroom and your viewers.
- Do engage all your viewers in your stream and to also focus on what they would enjoy seeing and hearing, while it might be pretty relaxing to have the freedom of mobile streaming in your hands, it is important to make your members relaxed too.
- Do prepare your surroundings and plan out your stream before starting, so you can adhere to the rules and also have a planned out stream, that will provide even more entertainment for both you and your viewers!

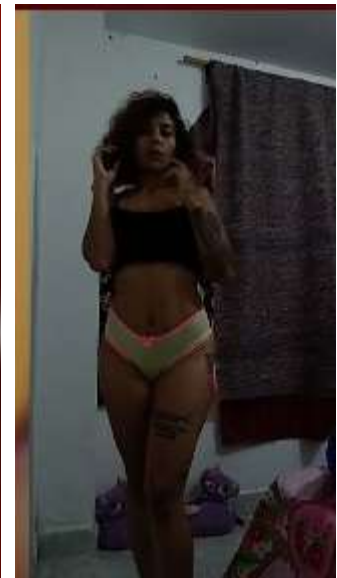

- Do make sure that your technical setup is adjusted and sufficient before each stream, while webcam streaming usually does not require much maintenance when it comes to technical elements, a mobile stream is more demanding in that regard, so for the best experience, have a list you can go through before each session.
- Don't go to crowded places or visit your friends intentionally while you are streaming, unregistered people are still a no-go for mobile streaming.
- Don't lose focus from your stream. While it is quite exciting that you can be flexible with your chosen streaming location and do a lot more things with just a mobile phone in your hand, don't get too distracted from your viewers, since you are all here to have a great time together.
- Don't rub your fingers across your microphone.
- Don't allow jewelry (like rings) to tap against the phone.
