

Adding your interests to your profile

Models

You can add your personal interests and likes to your profile so that users can get to know you better.

Head over to My Profile (you can access it from your drop-down menu) and then My Information. In the last row you will see "Interests"; select "Choose". Now you can select your interests and after, hit "Done". Users will be able to see the interest tags you chose in your profile. Moreover, users can also search models by interest in the search bar.
