

Creating a gallery

Models

In order to create a gallery of photos or videos you need to go to "My Profile", and then click on "Create an album" if you wish to upload photos, or the "Upload video" button if you wish to upload your videos.

You can sell your gallery content and earn tokens by setting the price as follows:

Photo albums (1-9,999 tokens)

Video gallery (1-9,999 tokens)

Gallery sales earnings are credited to the model's account the exact same way as other tokens are earned on the site. In addition you can set the access for your content by choosing your audience, which can be free for all, registered users, users in your friend list or simply for anyone that will pay the price you set.

You can also create photo and video albums for your [Fan Club](#), if you decide to enable it. These albums will be accessible only for Fan Club subscribers.

You need at least 1 public album with 5 photos to gain a good Stripscore.
