

Deleting Non-Account Holder documents on Model accounts

Models

You can remove documents of non-account holders from the Model account at any time. If you're an independent model, follow the instructions below:

Go to Documents

Click Edit

Find the model in question and click on them

Hit the Remove button

If your account is linked to the studio, the studio must remove the documents. Note that this process can only be completed by them.

Ask your studio to open their studio profile

Go to My Models

Click the model in question

Select Edit

Hit the Remove button
