

How much does Stripchat pay: payout percentage explained

How much does Stripchat pay: payout percentage explained

Models

How much does Stripchat pay models? On average, over 55% of all user spending is paid out, giving a clear view of earnings potential on the platform.

Users purchase tokens in packages with set prices. The larger the token package, the lower the price per token. However, models are always paid the same amount (\$0.05) per token. Therefore, the percentage paid to the model depends on the package purchased by the user.

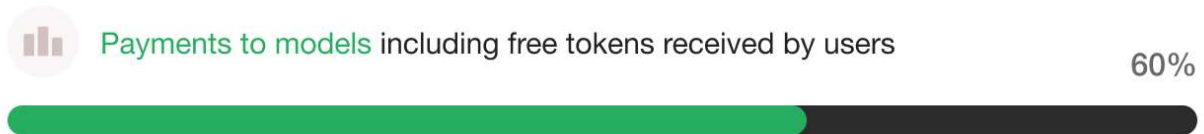

For example

Tkn Package	Price	Cost Per Tkn	Model Payout	Percentage
200	20.99	0.1049	0.05	48%
540	49.99	0.0925	0.05	54%
1100	96.99	0.0881	0.05	57%
2350	199.99	0.0851	0.05	59%
6200	499.99	0.0806	0.05	62%
12570	999.99	0.0795	0.05	63%

Most of the money spent on Stripchat come from regular users that purchase the larger token packages so the average always comes to more than 55%.

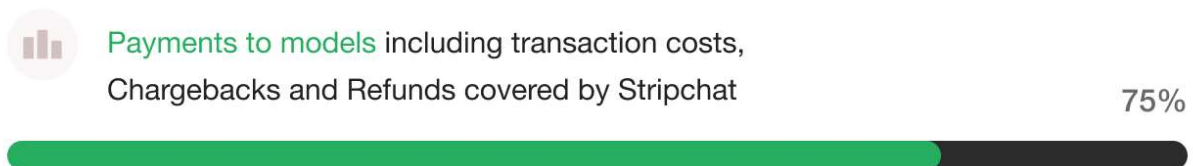

How much does Stripchat pay: payout percentage explained

Furthermore, Stripchat gives out a lot of free tokens as part of our hourly user Giveaway, our daily and monthly model Contest and the special promotions we offer from time to time. Taking these tokens into consideration the payout to models gets closer to 60%.

Stripchat pays all transaction costs in order to accept payments through Credit/Debit Cards, PayPal, Wire transfers, telephone payments and many other methods from all over the world. Furthermore, Stripchat pays all transaction costs for the payouts made to models so to ensure that they indeed receive the \$0.05 per token. If these costs are included in the calculation, the percentage paid to models increases to 70%.

Stripchat also handles almost all Chargebacks and Refunds (Fraud transactions) without taking any tokens back from the models and on most occasions without even notifying the model about it. So even if a payment from a user cannot be collected models are still paid in full. If these losses are included in the calculation, the actual percentage paid to models raises to over 75%.

Stripchat also pays all applicable VAT and Taxes on each sale of tokens, pays for advertising in order to bring users to the site and the model's room and covers all other expenses to have the site operational and keep adding new features.

To conclude, Stripchat possibly pays out the HIGHEST percentage to models.
