

How much do Stripchat models make: earnings per hour

How much do Stripchat models make: earnings per hour

Models

Stripchat income and earnings per hour show your average hourly rate, calculated based on your last 30 hours of streaming activity on the platform.

1 tk = \$0.05

It means that 20 tk = \$1 and 100 tk = \$5

If you want to know how much you'll get from 2,000 tk, for example, you can use this formula to calculate your model earnings:

$2,000 \text{ tk} / 100 \text{ tk} = 20$

$20 \times \$5 = \100
