

How to go live on Stripchat: start your stream and broadcast

How to go live on Stripchat: start your stream and broadcast

Models

The answer to the question “How to go live on Stripchat?” is simple: all you need to do is complete your details and verify documents to confirm ownership and unlock secure access to start your broadcast.

This information will not be visible to website's visitors and it will be crosschecked with the given documents. For this reason, it's important that you write your full name exactly as it appears on your ID.

If you're not a webcam model yet but want to become one, use this link to register: <https://stripchat.com/signup/model>

The screenshot shows the 'My documents' page on the Stripchat website. The page has a dark theme with a red header. The header includes the Stripchat logo, a '4204 LIVE' indicator, 'Top Models' link, a search bar, and user statistics (5 025 followers, 316 likes). The navigation bar lists: My Profile, My Timeline, My Messages, My Fan Club, My Friends, My Knights, My Followings, Settings and Privacy, Referral Program, Documents, and More. The 'Documents' section is active, showing an 'Important note' about document requirements. Below this is a 'Personal Information' form with fields for First name, Last name, Gender, Birth date, ID number, Address, ID Issuing Country, and City. To the right is a 'Documents' section with a 'Close-up photo of your ID' upload area and a 'Photo of you holding your ID and a handwritten note' upload area. A circular callout highlights the 'Settings and Privacy' menu item in the right sidebar, which also includes Timeline, My Messages, My Fan Club, My Friends, My Knights, My Followings, Settings and Privacy, Referral Program, Documents, Banned & Muted, and Logout. At the bottom, there is a 'See my model agreement' link and a 'Request Approval' button.

We support mobile streaming so you can also stream from your mobile device and take your fans anywhere. Just make sure that you're using the last version of Firefox or Chrome.

Unfortunately, the mobile streaming technology we use on our site is not supported by all the devices out there. You won't be able to broadcast using Honor, ZTE or Huawei smartphones. Overall, we can't recommend any Chinese phones due to technological incompatibility, but here's our list of recommended devices for mobile broadcasting: Samsung Galaxy S8+, S9, S9+, S10, S10+, iPhone 7 and above, Google Pixel 2, Sony Xperia, and tablets.
