

The importance of a photo gallery

Models

When you are offline or unavailable because of a Private show, a photo gallery is especially entertaining and informative for your visitors to get to know you and make them come back to you when you are online and/or available for a chat with them!

Investing some energy in setting up and maintaining a nice photo gallery with fresh material now and again can help you promote yourself even when you are offline because you'll look extremely catchy to users that could be your potential Knights and Kings of the room.

In addition, having public galleries of photos and videos is one of the factors that accounts for your StripScore, which directly impacts traffic in your room.

It is also wise to have separate albums, one available to all visitors (and filled with material that is not revealing all your best photos, just giving them a taste to demand more exclusive material from you) and one that only registered users have access to, containing your best material.

You can also give your friends on Stripchat access to "Friends Only" albums for no tokens to show them how much you appreciate them.

There are a few options you can play around with regarding the exclusive photo albums that are a great means for you to have passive income. With the paid album feature, you can create special albums that you can sell regardless you're online or offline.
