

What is Epic goal?

What is Epic goal?

Models

Epic goal is a feature to help you reach higher goals as you motivate your audience to spend more. This is your chance to dream big and add anything you want to achieve, as long as it doesn't break any of our broadcasting rules.

When enabled, Epic goal will always be available and visible to viewers in your profile, so that they can send tokens at any time (even when you're offline).

Every time a viewer makes a contribution to your Epic goal, it will be announced in the chat for everyone, as well as once it's reached.

Only tokens sent directly from the Epic goal section count toward it. You receive these tokens immediately.

How to enable Epic goal?

Go to "My Profile"> find the "Epic Goal" panel under "My Information"

Enable the switch > write your goal and add the token amount to be reached, starting at 2,000

Hit "Publish"

You will have a progress bar where you can check how far along you are in reaching the goal and how many viewers have contributed. All your previously achieved Epic goals will also be displayed there.
