

What is "Feed"?

Models

"Feed" is a section where users can view your Stripchat activity log. Each time you have updates or make changes to your content (new photos and videos, win contests, etc.), it will be automatically posted to "Feed" to keep users who have you in their Favorites notified. Moreover, users can buy your photo and video content directly from "Feed". You can also create your own posts and share your plans, news, thoughts, memories, impressions or anything else you'd like them to know about.

You can access "Feed" from your drop-down menu. There, you can see all your posts and create new ones. If you wish to edit or delete an existing post, click on the three dots at the top-right corner of such post to display both options.

"Feed" is a great opportunity to make users interested in your content and attract them to your page, so try to upload content and create posts frequently to make the most of this feature.

In your profile, there's a tab named "Fan Club & Feed" where users can see all the updates and posts from both features.
