

Wheel of Fortune for models

Models

The celebrated game of spinning the wheel can be integrated in your room to add some extra fun to your public shows. You or your viewers can spin the Wheel during the show and win an activity that you then perform for them. You decide what activities to include and how much you charge for a spin. You can create up to 3 Wheels with different activities and pricing. All Wheels you create will be active at the same time and viewers will be able to choose which one they want to spin.

How to install Wheel of Fortune?

Go to your broadcasting page and then to Extensions tab.

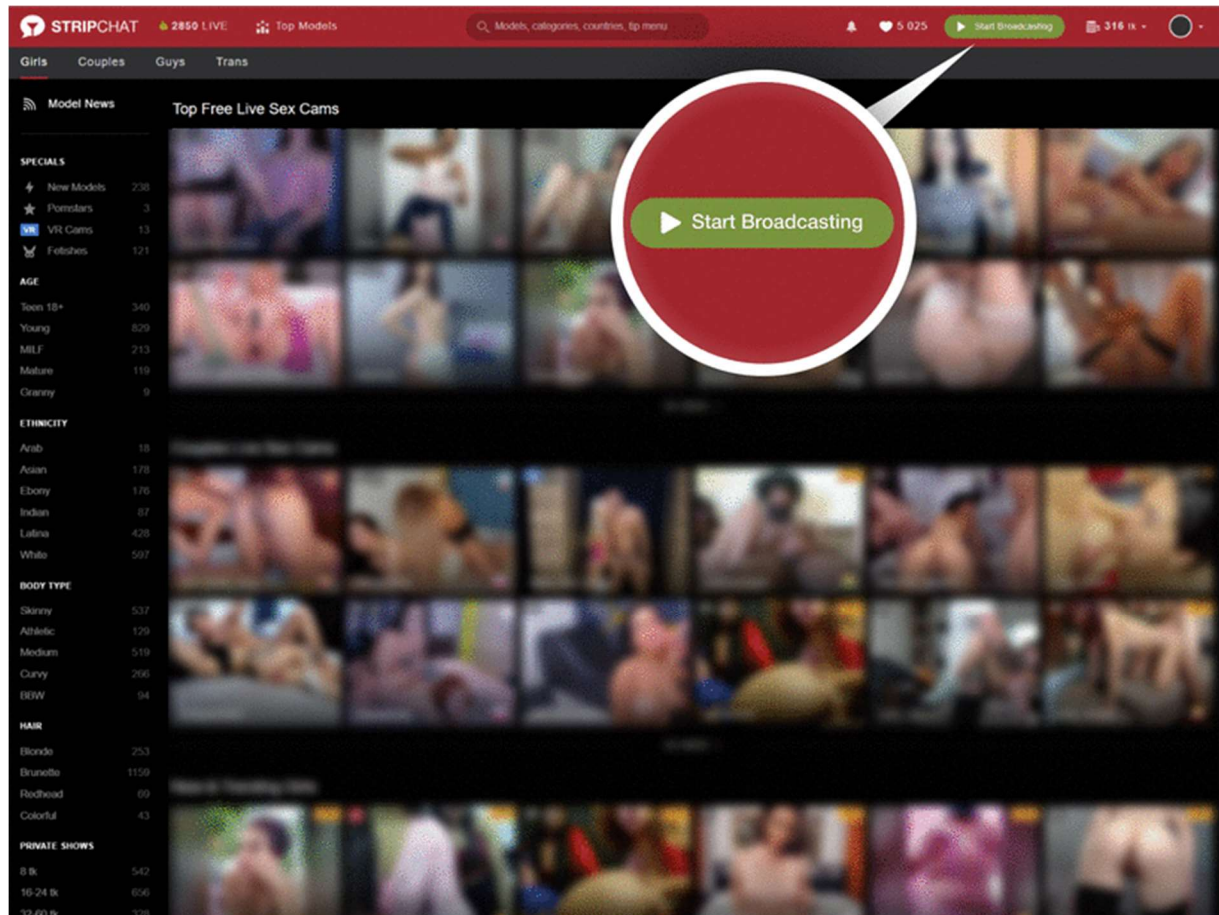

In the Extensions Library, find the Wheel of Fortune extension.

Click on “Install”.

Set up your Wheel: name it, choose a color, add your activities, and price per spin.

Click on “Save”.

Wheel of Fortune for models

Now your Wheel of Fortune is installed and located above the Extension Library. Lastly, enable the switch to activate it in your room. If you want to remove it from your room, simply disable the switch. To fully uninstall it, click on the settings icon, and then “Remove”, or “Setup” to edit at any time.
